Datasheet

Antibes bench of cm. 150

Product code 1114-150

Rev. 0 of 10/06/2016

DESCRIPTION

Structure

Antibes bench composed of N. 2 supports in galvanized steel sheet thickness mm. 8, obtained by high definition plasma cutting, characterized by decorative carvings. Each single support is equipped with plates at the base for fixing to the ground.

- Seat/backrest shell made with N. 32 profiles in galvanized steel round tube Ø mm. 20x1.5 complete with PVC end caps with spherical head.
- The profiles are welded on special galvanized steel templates that give them the anatomical shape.

Total weight: 56Kg

COLOR FINISH AS PROVIDED IN THE CATALOG

Gunmetal gray
(Steel parts)

Customers can request a different finish from the RAL color options available on our website.

ANTICORROSIVE TREATMENTS AND FINISHES

Washing

Spray treatment for removing oil and grease from metal surfaces using special degreasing liquids. Subsequent drying in dryer for 15 minutes.

Sandblasting

Manual sandblasting process with river sand, which increases the porosity of metal surfaces and thus the adhesion of thermosetting powders.

Anti-corrosive application

First painting cycle with an anticorrosive thermosetting powder primer based on epoxy resins and special pigments. It provides adequate protection against weathering.

Anticorrosive polymerization

Baking in an industrial curing oven at a temperature of 180°C. During this stage, the powder turns into a uniform, smooth and durable coating.

Colored finish application

Final coating cycle with thermosetting powders. Application follows the same principles as the anticorrosive.

Polymerization colored finish

Final baking in an industrial curing oven at a temperature of 180°C. The procedure follows the same principles as the curing of the anticorrosive. The powder is transformed into a uniform coating, and the surface appearance takes on the characteristics of the chosen color type, e.g. smooth, textured, wrinkled, etc.

Rev. 0 of 10/06/2016

DELIVERY

Product supplied in assembly kit with steel hardware and instructions for mounting and grounding.

FIXING

The product is prepared for fixing to the ground using anchor bolts and expansion plugs.
