## Econ Autopsy Table.

Product code 1123

Rev. 0 of 31/10/2024

1/5

DESCRIPTION

STRUCTURE

- Made of mm. square galvanized steel tube. 40x40x2; equipped with connection spars in mm. galvanized steel square tube. 20x20x1.5. Decorative elements and container ring in galvanized steel.
- Coffin support surface made of 15/10 thick AISI 304 stainless steel sheet with watertight perimeter edge, conveyor ribs and hole for liquid drainage. Plastic liquid container.

DIMENSIONS

- Total length cm. 240;
- Total width cm. 90;
- Total height cm. 90;
- Weight kg. 65.

## ANTICORROSIVE TREATMENTS AND FINISHES

### Washing

Spray treatment for removing oil and grease from metal surfaces using special degreasing liquids. Subsequent drying in dryer for 15 minutes.

### Sandblasting

Manual sandblasting process with river sand, which increases the porosity of metal surfaces and thus the adhesion of thermosetting powders.

### Anti-corrosive application

First painting cycle with an anticorrosive thermosetting powder primer based on epoxy resins and special pigments. It provides adequate protection against weathering.

### Anticorrosive polymerization

Baking in an industrial curing oven at a temperature of 180°C. During this stage, the powder turns into a uniform, smooth and durable coating.

### Colored finish application

Final coating cycle with thermosetting powders. Application follows the same principles as the anticorrosive.

### Polymerization colored finish

Final baking in an industrial curing oven at a temperature of 180°C. The procedure follows the same principles as the curing of the anticorrosive. The powder is transformed into a uniform coating, and the surface appearance takes on the characteristics of the chosen color type, e.g. smooth, textured, wrinkled, etc.

4/5

DELIVERY

Product supplied already assembled, no need for fastening hardware.

FIXING

Fixing not necessary
