

DESCRIPTION

STRUCTURE

- Removable pit tent consisting of n. 4 vertical uprights, made of Ø mm galvanized steel round tube. 35x1.5 complete with base plates.
- Half PVC sheet covering with locking strap.

DIMENSIONS

- Width cm. 200;
- Height cm. 230;
- Total depth cm. 231.

ANTICORROSIVE TREATMENTS AND FINISHES

Washing

Spray treatment for removing oil and grease from metal surfaces using special degreasing liquids. Subsequent drying in dryer for 15 minutes.

Sandblasting

Manual sandblasting process with river sand, which increases the porosity of metal surfaces and thus the adhesion of thermosetting powders.

Anti-corrosive application

First painting cycle with an anticorrosive thermosetting powder primer based on epoxy resins and special pigments. It provides adequate protection against weathering.

Anticorrosive polymerization

Baking in an industrial curing oven at a temperature of 180°C. During this stage, the powder turns into a uniform, smooth and durable coating.

Colored finish application

Final coating cycle with thermosetting powders. Application follows the same principles as the anticorrosive.

Polymerization colored finish

Final baking in an industrial curing oven at a temperature of 180°C. The procedure follows the same principles as the curing of the anticorrosive. The powder is transformed into a uniform coating, and the surface appearance takes on the characteristics of the chosen color type, e.g. smooth, textured, wrinkled, etc.

No treatments

The product does not undergo treatments

DELIVERY

Product supplied in assembly kit with steel hardware and instructions for mounting and grounding.

FIXING

Fixing not necessary
