Datasheet

Ashtray Arkea

Product code 247

Rev. 0 of 10/06/2016

DESCRIPTION

Structure

Arkea ashtray composed of an arched support upright, made of galvanized steel round tube Ø mm. 60x2 complete with PVC end caps with spherical heads. Shaped container in galvanized steel sheet thickness mm. 1.5 with anti-cut edge in round tube Ø mm. 16x1.2. Decorative steel cable. Base with circular plate in galvanized sheet metal.

Overall weight: 5Kg

COLOR FINISH AS PROVIDED IN THE CATALOG

RAL 9016
(Steel parts)

Customers can request a different finish from the RAL color options available on our website.

ANTICORROSIVE TREATMENTS AND FINISHES

Washing

Spray treatment for removing oil and grease from metal surfaces using special degreasing liquids. Subsequent drying in dryer for 15 minutes.

Sandblasting

Manual sandblasting process with river sand, which increases the porosity of metal surfaces and thus the adhesion of thermosetting powders.

Anti-corrosive application

First painting cycle with an anticorrosive thermosetting powder primer based on epoxy resins and special pigments. It provides adequate protection against weathering.

Anticorrosive polymerization

Baking in an industrial curing oven at a temperature of 180°C. During this stage, the powder turns into a uniform, smooth and durable coating.

Colored finish application

Final coating cycle with thermosetting powders. Application follows the same principles as the anticorrosive.

Polymerization colored finish

Final baking in an industrial curing oven at a temperature of 180°C. The procedure follows the same principles as the curing of the anticorrosive. The powder is transformed into a uniform coating, and the surface appearance takes on the characteristics of the chosen color type, e.g. smooth, textured, wrinkled, etc.

DELIVERY

Product supplied in assembly kit with steel hardware and instructions for mounting and grounding.

FIXING

The product is prepared for fixing to the ground using anchor bolts and expansion plugs.
