Bucatino bike rack

Product code 605

Rev. 0 of 09/07/2024

DESCRIPTION

Structure

A stand that supports four bicycles, but also able to accommodate and secure scooters and motorcycles. The continuous line of the structure creates a clean design with delicate lines, easily adaptable to architectural projects, whether contemporary or historical.

- Structure made entirely of round profile of galvanized steel Ø 60x2 mm.

Total weight: 12Kg

ANTICORROSIVE TREATMENTS AND FINISHES

Washing

Spray treatment for removing oil and grease from metal surfaces using special degreasing liquids. Subsequent drying in dryer for 15 minutes.

Sandblasting

Manual sandblasting process with river sand, which increases the porosity of metal surfaces and thus the adhesion of thermosetting powders.

Anti-corrosive application

First painting cycle with an anticorrosive thermosetting powder primer based on epoxy resins and special pigments. It provides adequate protection against weathering.

Anticorrosive polymerization

Baking in an industrial curing oven at a temperature of 180°C. During this stage, the powder turns into a uniform, smooth and durable coating.

Colored finish application

Final coating cycle with thermosetting powders. Application follows the same principles as the anticorrosive.

Polymerization colored finish

Final baking in an industrial curing oven at a temperature of 180°C. The procedure follows the same principles as the curing of the anticorrosive. The powder is transformed into a uniform coating, and the surface appearance takes on the characteristics of the chosen color type, e.g. smooth, textured, wrinkled, etc.

4/5

Dimcar reserves the right to make, at any time, changes on the products deemed useful to improve the quality of the same; the images contained in the sheets may not faithfully reproduce the real colors of the items.

DELIVERY

Product supplied already assembled, no need for fastening hardware.

FIXING

The product must be installed by cementing.
