DESCRIPTION

Structure

The Diapason bin with pole attachment is made up of a main body consisting of a shaped support made of 60x30 mm oval section galvanized steel profile and an upper ring with a circular hole for introducing waste, made of 3 mm thick galvanized sheet metal and obtained by laser cutting.

- Frame consisting of a curved rear panel and front door made of galvanized sheet metal.
- Rear panel equipped with a shaped support for pole attachment, door equipped with a lock for opening and extracting the bag (not supplied).

Overall weight: 27Kg

COLOR FINISH AS PROVIDED IN THE CATALOG

RAL 7005
(Basket)

RAL 1018
(Support, ring.)

Customers can request a different finish from the RAL color options available on our website.

PRODUCT OPTIONALS

Product code 431 - Ashtray Bond

PRODUCT VARIANTS

Product code G505-BIS - Diapason litter bin pole mounting and lid

ANTICORROSIVE TREATMENTS AND FINISHES

Washing

Spray treatment is used to get rid of oils and fats from metal surfaces by using special degreasing liquids. The process involves drying in a dryer for 15 minutes.

Sandblasting

The porosity of metal surfaces is increased by the manual sandblasting process with river sand, which results in an increase in thermosetting powder adhesion.

Anticorrosive application

The first step in the coating process involves using a thermosetting powder anti-corrosion base made of epoxy resins and specific pigments. It provides enough protection against the elements.

Anticorrosive polymerization

The process involves cooking in an industrial curing oven at 180°C. In this step, the powder is transformed into a coating that is uniform, smooth, and lasting.

Polymerization coloured finish

The final phase of coating with thermosetting powders. The application complies with the same principles as the anti-corrosion.

Polymerization colored finish

The final product will be cured in an industrial curing oven at a temperature of 180°C. The procedure is based on the same principles as the polymerization of the anti-corrosion agent. The powder becomes a uniform coating, and the surface becomes the characteristics of the chosen color type, including smooth, peeled, or wrinkled, etc.

DELIVERY

The product comes with steel screws and fixing instructions.

FIXING

The product has a slotted rear bracket for attachment to the existing pole using metal ties
