DESCRIPTION

Structure

9-seater Pireo bike rack with display composed of 2 supports in white stone-effect concrete: each individual support is equipped with a 55x2 mm galvanized steel round tube compass inside which allows the insertion and locking of the table-holder frame. 2 horizontal connecting crosspieces in 50x20x1.5 mm galvanized steel rectangular tube complete with support feet. 5 arch-shaped bike-holder brackets in 40x20x1.5 mm oval-section galvanized steel tube.

- Double-sided table composed of a table-holder frame and upper arch in 48x2 mm galvanized steel round tube; the frame is equipped with 4 plates for connecting the table.
- Perimeter frame made of 1.2 mm thick galvanized steel box.
- 1.2 mm thick galvanized sheet metal billboard panel applied inside the boxed profile; 4 galvanized sheet metal connection plates welded on the short sides of the perimeter frame.

Total weight: 182Kg

ANTICORROSIVE TREATMENTS AND FINISHES

Washing

Spray treatment for removing oil and grease from metal surfaces using special degreasing liquids. Subsequent drying in dryer for 15 minutes.

Sandblasting

Manual sandblasting process with river sand, which increases the porosity of metal surfaces and thus the adhesion of thermosetting powders.

Anti-corrosive application

First painting cycle with an anticorrosive thermosetting powder primer based on epoxy resins and special pigments. It provides adequate protection against weathering.

Anticorrosive polymerization

Baking in an industrial curing oven at a temperature of 180°C. During this stage, the powder turns into a uniform, smooth and durable coating.

Colored finish application

Final coating cycle with thermosetting powders. Application follows the same principles as the anticorrosive.

Polymerization colored finish

Final baking in an industrial curing oven at a temperature of 180°C. The procedure follows the same principles as the curing of the anticorrosive. The powder is transformed into a uniform coating, and the surface appearance takes on the characteristics of the chosen color type, e.g. smooth, textured, wrinkled, etc.

DELIVERY

Product supplied in assembly kit with steel hardware and instructions for mounting and grounding.

FIXING

The product is prepared for fixing to the ground using anchor bolts and expansion plugs.
