DESCRIPTION

Structure

Single Clean model anti-terrorism bin, for wall mounting. Consisting of N. 01 support bracket in 100x6 mm galvanized plate with holes for wall mounting; and connection bracket, for fixing the ring, in 50x8 mm galvanized plate.

- Bag-holder ring consisting of a shaped lid, of the opening type, made of 1.2 mm thick galvanized sheet metal with anti-cut edging and a plate indicating the type of collection.
- The lid is hinged to the bag-holder ring and provided with a hole for inserting waste.
- Fixed internal bag-holder made of galvanized steel profile.
- Emptying by opening the bag-holder ring and extracting the bag (bag not supplied).

Overall weight: 3Kg

TREATMENTS AND FINISHES THAT PREVENT CORROSION

Washing

Spray treatment is used to get rid of oils and fats from metal surfaces by using special degreasing liquids. The process involves drying in a dryer for 15 minutes.

Sandblasting

The porosity of metal surfaces is increased by the manual sandblasting process with river sand, which results in an increase in thermosetting powder adhesion.

Anticorrosive application

The first step in the coating process involves using a thermosetting powder anti-corrosion base made of epoxy resins and specific pigments. It provides enough protection against the elements.

Anticorrosive polymerization

The process involves cooking in an industrial curing oven at 180°C. In this step, the powder is transformed into a coating that is uniform, smooth, and lasting.

Polymerization coloured finish

The final phase of coating with thermosetting powders. The application complies with the same principles as the anti-corrosion.

Polymerization colored finish

The final product will be cured in an industrial curing oven at a temperature of 180°C. The procedure is based on the same principles as the polymerization of the anti-corrosion agent. The powder becomes a uniform coating, and the surface becomes the characteristics of the chosen color type, including smooth, peeled, or wrinkled, etc.

DELIVERY

Prodotto fornito in kit di assemblaggio con viteria in acciaio ed istruzioni per il montaggio e fissaggio.

FIXING

Il fissaggio avviene utilizzando una piastra di sostegno provvista di fori per il fissaggio a muro a mezzo tirafondi e tasselli ad espansione
