Datasheet

Madrid bench of cm. 150

Product code 1110-150

Rev. 1 of 10/09/2019

DESCRIPTION

Structure

Madrid bench composed of N. 2 shaped supports in square tube of galvanized steel mm. 30x30x1.5. Each single support is provided with plates at the base in galvanized steel.

- Seat-backrest shell made with N. 14 profiles in oval section galvanized steel tube mm. 40x20x1.5 complete with PVC end caps.
- The profiles are welded on special galvanized steel shapes that give them the anatomical shape.

Overall weight: 32Kg

Datasheet

Product code 1110-150

Rev. 1 of 10/09/2019

FINISH ACCORDING TO THE CATALOGUE

RAL 2000
(Steel parts)

Customers can request a different finish from the RAL color options available on our website.

TREATMENTS AND FINISHES THAT PREVENT CORROSION

Washing

Spray treatment is used to get rid of oils and fats from metal surfaces by using special degreasing liquids. The process involves drying in a dryer for 15 minutes.

Sandblasting

The porosity of metal surfaces is increased by the manual sandblasting process with river sand, which results in an increase in thermosetting powder adhesion.

Anticorrosive application

The first step in the coating process involves using a thermosetting powder anti-corrosion base made of epoxy resins and specific pigments. It provides enough protection against the elements.

Anticorrosive polymerization

The process involves cooking in an industrial curing oven at 180°C. In this step, the powder is transformed into a coating that is uniform, smooth, and lasting.

Polymerization coloured finish

The final phase of coating with thermosetting powders. The application complies with the same principles as the anti-corrosion.

Polymerization colored finish

The final product will be cured in an industrial curing oven at a temperature of 180°C. The procedure is based on the same principles as the polymerization of the anti-corrosion agent. The powder becomes a uniform coating, and the surface becomes the characteristics of the chosen color type, including smooth, peeled, or wrinkled, etc.

DELIVERY

Prodotto fornito in kit di assemblaggio con viteria in acciaio ed istruzioni per il montaggio e fissaggio.

FIXING

Il prodotto è predisposto per il fissaggio al suolo mediante tirafondi e tasselli ad espansione.

CORPORATE CERTIFICATES
